GEOMETRIC ANALYSIS

COMPLEX ANALYTIC GEOMETRY, DIFFERENTIAL GEOMETRY

Local homological properties of analytic sets (with A. Verona), Manuscripta Math., 7, 1972, 55–66.

REGULARIZED DETERMINANTS AND APPLICATIONS

On the functional logdet and related flows on the space of closed embedded curves on $S^2$ (with L. Friedlander and T. Kappeler and
SPECTRAL GEOMETRY AND TORSION

Removing Metric anomalies from Ray Singer torsion, Letters in Mathematical Physics 47, 1999, 149-158.

Lectures on Witten-Helffer-Sjöstrand theory (Proceedings of the third international workshop in geometry and applications and the first German-Romanian seminar in Geometry, Sibiu, 1997), Astérisque Association, 85-99, (preprint Schrödinger Institute, No 572).

Euler structures, the variety of representations and the Milnor-Turaev torsion (with Stefan Haller), Geom. Topol. 10 pp. 1185-1238.

A Riemmanian invariabnt, Euler structures and some topological applications (with Stefan Haller) (in Proc. of the conference on $C^*$-algebras and Elliptic Theory), Trends in Mathematics, 2006, 37-60, Birkhauser-Verlag, Basel.

NONLINEAR PROBLEMS

Results on infinite dimensional topology and applications to the structure of the critical set of Nonlinear Sturm-Liouville Operators (with C. Tomei and N. Saldanha), J. Differential Equations 188 (2003) 569-590.

The geometry of the critical set of nonlinear periodic Sturm-Liouville operators (with N. Saldanha and C. Tomei), J. Differential Equations 246 (2009), no. 8, 33803399.

DYNAMICS
