

Publications of Paul Nevai

1. The de La Vallée Poussin operator and trigonometric polynomial operations, in Hungarian, prize winning work submitted to the 1970 Hungarian Scientific Student Conference (OTDK), 1969, 23 pages, unpublished, scanned & e-published in 09/2013, arXiv:math/TBA.
2. Lagrange interpolation based on the zeros of Laguerre polynomials, in Hungarian, *Mat. Lapok* 22 (1971), 149–164. MR 48:2620
3. Some cases when trigonometric interpolation gives approximation of the best order, in Russian, *Studia Sci. Math. Hungar.* 7 (1972), 379–390. MR 49:11125
4. An asymptotic formula for the convergence of trigonometric interpolation, in Russian, *Studia Sci. Math. Hungar.* 7 (1972), 391–394. MR 48:9221
5. On the deviation of trigonometric interpolation sums, in Russian, *Acta Math. Acad. Sci. Hungar.* 23 (1972), 203–205. MR 48:781
6. A note on a theorem of G. I. Natanson, in Russian, *Acta Math. Acad. Sci. Hungar.* 23 (1972), 219–221. MR 47:9141
7. Hermite-Fejér interpolation process based on the zeros of Hermite polynomials, in Russian, *Acta Math. Acad. Sci. Hungar.* 23 (1972), 247–253. MR 48:2621
8. One-sided approximation by polynomials with applications, in German, *Acta Math. Acad. Sci. Hungar.* 23 (1972), 496–506. MR 49:933
9. Lagrange interpolation on the real line, in Hungarian, *Mat. Lapok* 23 (1972), 143–146. MR 50:2747
10. Fourier series and interpolation, I (Fourier series and trigonometric Lagrange interpolation), in Hungarian, *Mat. Lapok* 23 (1972), 261–290. MR 51:6262
11. Fourier series and interpolation, II (Polynomial Lagrange interpolation), in Hungarian, *Mat. Lapok* 24 (1973), 49–61. MR 53:8764
12. One-sided approximation by polynomials in $(0, \infty)$, in German, *Periodica Math.* 4 (1973), 147–156. MR 51:1208
13. Trigonometric interpolation at equidistant points, in Hungarian, *Magyar Tud. Akad. III. Oszt. Közl.* 21 (1973), 449–484. MR 48:6792
14. One-sided approximation by polynomials, III (with G. Freud), in German, *Acta Sci. Math. Szeged* 35 (1973), 65–72. MR 49:943
15. On an inequality of G. Freud, in Russian, *Annales Univ. Bud. R. Eötvös, Sect. Math.* 16 (1973), 87–92. MR 50:7937
16. Notes on trigonometric interpolation and Fourier sums, in Russian, *Studia Sci. Math. Hungar.* 8 (1973), 113–122. MR 48:6793
- 17a. Some properties of orthogonal polynomials corresponding to the weight $(1+x^{2k})^\alpha \exp(-x^{2k})$ and their application in approximation theory, in Russian, *Doklady Akad. Nauk SSSR* 211 (1973), 784–786. MR 49:3380
- 17b. Some properties of orthogonal polynomials corresponding to the weight $(1+x^{2k})^\alpha \exp(-x^{2k})$ and their application in approximation theory, *Soviet Math. Dokl.* 14 (1973), 1116–1119. MR 49:3380
18. Lagrange interpolation based on the zeros of Hermite polynomials, in Russian, *Acta Math. Acad. Sci. Hungar.* 24 (1973), 209–213. MR 47:3878
19. Orthogonal polynomials on the real line associated with the weight $|x|^\alpha \exp(-|x|^\beta)$, I, in Russian, *Acta Math. Acad. Sci. Hungar.* 24 (1973), 335–342. MR 48:8896
20. On the Dini–Lipschitz convergence test, in Russian, *Acta Math. Acad. Sci. Hungar.* 24 (1973), 349–351. MR 49:3415
21. Approximation of periodic functions of several variables, I, in Russian, *Acta Math. Acad. Sci. Hungar.*

- 24 (1973), 407–416. MR 54:3289
22. Weighted L^1 and one-sided weighted L^1 polynomial approximation on the real line (with G. Freud), in Hungarian, Magyar Tud. Akad. III. Oszt. Közl. 21 (1973), 485–502. MR 48:9182
23. On convergence of Lagrange interpolation based on Laguerre nodes, in Russian, Publ. Math. Debrecen 20 (1973), 235–239. MR 48:9175
24. *Fourier Series and Interpolation*, in Hungarian, Ph. D. Dissertation, Budapest, 1973.
25. Notes on interpolation, in Russian, Acta Math. Acad. Sci. Hungar. 25 (1974), 123–144. MR 52:3799
26. A new proof of Riemann’s localization principle, Acta Math. Acad. Sci. Hungar. 25 (1974), 145. MR 51:1260
27. Localization theorems for convergence of Lagrange interpolation based on the zeros of Hermite polynomials, in Russian, Acta Math. Acad. Sci. Hungar. 25 (1974), 341–361. MR 50:13977
28. On summability of Fourier transforms, Acta Math. Acad. Sci. Hungar. 25 (1974), 415–418. MR 50:5351
29. Two theorems on Fourier sums, in Russian, Studia Sci. Math. Hungar. 8 (1973), 323–328. MR 51:1245
30. On a theorem of A. C. Offord and its analogue for Fourier series, Arkiv för Matematik 12 (1974), 221–233. MR 51:3782
31. Trigonometric interpolation at equidistant nodes, in *Approximation Theory*, Z. Ciesielski and J. Musielak, eds., D. Reidel Publ. Co., Boston, 1975, 153–155. MR 56:6256
32. On an interpolation process with applications to Fourier series (with O. Kis), Acta Math. Acad. Sci. Hungar. 26 (1975), 385–403. MR 53:6206
33. On Fourier series, *Mathematica, Revue d’Analyse Numérique et de Théorie de l’Approximation* 5 (1976), 181–188. MR 58:6876
34. Mean convergence of Lagrange interpolation, *J. Approx. Theory* 18 (1976), 363–377. MR 54:13375
35. Lagrange interpolation at zeros of orthogonal polynomials, in *Approximation Theory II*, G. G. Lorentz, C. K. Chui, and L. L. Schumaker, eds., Academic Press, New York, 1976, 163–201. MR 54:13374
36. Orthogonal polynomials, in *Problems in Approximation Theory* by G. G. Lorentz, Lecture Notes in Mathematics, The University of Arkansas, Fayetteville, Arkansas, 1977, 65–77. MR 57:6948
- 37a. *Orthogonal Polynomials*, MRC Technical Summary Report #1726, University of Wisconsin, Madison, Wisconsin, 1977, 1–231.
- 37b. *Orthogonal Polynomials*, *Memoirs Amer. Math. Soc.* 213 (1979), 1–185. MR 80k:42025
- 38a. On an extremal problem, MRC Technical Summary Report #1712, University of Wisconsin, Madison, Wisconsin, 1977, 1–8.
- 38b. On an extremal problem, *Proc. Amer. Math. Soc.* 74 (1979), 301–306. MR 81e:42035
- 39a. Bernstein’s inequality in L^p for $0 < p < 1$, MRC Technical Summary Report #1728, University of Wisconsin, Madison, Wisconsin, 1977, 1–5.
- 39b. Bernstein’s inequality in L^p for $0 < p < 1$, *J. Approx. Theory* 27 (1979), 239–243. MR 80m:41009
- 40a. On orthogonal polynomials, MRC Technical Summary Report #1760, University of Wisconsin, Madison, Wisconsin, 1977, 1–5.
- 40b. On orthogonal polynomials, *J. Approx. Theory* 25 (1979), 34–37. MR 81c:42032
- 41a. An asymptotic formula for the derivatives of orthogonal polynomials, MRC Technical Summary Report #1784, University of Wisconsin, Madison, Wisconsin, 1977, 1–8.
- 41b. An asymptotic formula for the derivatives of orthogonal polynomials, *SIAM J. Math. Anal.* 10 (1979), 472–477. MR 80j:42040
42. Distribution of zeros of orthogonal polynomials, *Trans. Amer. Math. Soc.* 249 (1979), 341–361. MR 80j:42041

43. Orthogonal polynomials defined by a recurrence Relation, *Trans. Amer. Math. Soc.* 250 (1979), 369–384. MR 80d:42011
 44. On asymptotic average properties of zeros of orthogonal polynomials (with J. S. Dehesa), *SIAM J. Math. Anal.* 10 (1979), 1184–1192. MR 80m:42031
 45. Bernstein’s inequality in L^p for $0 < p < 1$ and $(C, 1)$ bounds for orthogonal polynomials (with A. Máté), *Ann. Math.* 111 (1980), 145–154. MR 81c:42003
- MISC. List of publications of Paul Turán, *J. Approx. Theory*, 29:1 (1980), 14–22.
- MISC. On some open problems of approximation theory (George G. Lorentz and I edited Peter Szűsz’s English translation of Paul Turán’s paper), *J. Approx. Theory*, 29:1 (1980), 23–85.
- MISC. Recent papers dealing with Turán’s problems (with George G. Lorentz, Vera Sós, and József Szabados), *J. Approx. Theory*, 29:1 (1980), 86–89.
46. Mean convergence of Lagrange interpolation, II, *J. Approx. Theory* 30 (1980), 263–276. MR 82i:41003
 47. Eigenvalue distribution of Toeplitz matrices, *Proc. Amer. Math. Soc.* 80 (1980), 247–253. MR 82c:15012
 48. Convergence and summability of orthogonal series, in *Approximation Theory III*, E. W. Cheney, ed., Academic Press, New York, 1980, 679–685. MR 82c:42022
 49. Series of orthogonal polynomials as boundary values (with G. G. Walter), *SIAM J. Math. Anal.* 12 (1981), 502–513. MR 83d:42028
 50. Orthogonal polynomials and measures with finitely many point masses (with T. S. Chihara), *J. Approx. Theory* 35 (1982), 370–380. MR 83i:42017
 51. Remarks on E. A. Rahmanov’s paper “On the asymptotics of the ratio of orthogonal polynomials” (with A. Máté), *J. Approx. Theory* 36 (1982), 64–72. MR 83m:42017
 52. Location of the zeros of a polynomial (Problem solution), *SIAM Review* 24 (1982), 80.
 53. Necessary and sufficient conditions relating the coefficients in the recurrence formula to the spectral function for orthogonal polynomials (with J. S. Geronimo), *SIAM J. Math. Anal.* 14 (1983), 622–637. MR 84i:42037
 54. Orthogonal polynomials associated with $\exp(-x^4)$, in *Second Edmonton Conference on Approximation Theory*, Canadian Math. Soc. Conf. Proc. 3 (1983), 263–285. MR 85b:42012
 55. Hermite-Fejér interpolation at zeros of generalized Jacobi polynomials (with P. Vértesi), in *Approximation Theory IV*, C. K. Chui, L. L. Schumaker, and J. D. Ward, eds., Academic Press, New York, 1983, 629–633. MR 85g:41002
 56. Orthogonal polynomials and absolutely continuous measures, (with A. Máté), in *Approximation Theory IV*, C. K. Chui, L. L. Schumaker, and J. D. Ward, eds., Academic Press, New York, 1983, 611–617. MR 85j:42044
 57. Sublinear perturbations of the differential equation $y^{(n)} = 0$ and of the analogous difference equation (with A. Máté), *J. Differential Eq.* 53 (1984), 234–257. MR 86d:34062
 58. Mean convergence of Lagrange interpolation, III, *Trans. Amer. Math. Soc.* 282 (1984), 669–698. MR 85c:41009
 59. What is beyond Szegő’s theory of orthogonal polynomials (with A. Máté and V. Totik), in *Rational Approximation and Interpolation*, P. R. Graves-Morris, E. B. Saff and R. S. Varga, eds., Lecture Notes in Mathematics, Vol. 1105, Springer Verlag, New York, 1984, 502–510. MR 87b:42028
 60. Orthogonal polynomials and their derivatives, I (with S. S. Bonan), *J. Approx. Theory* 40 (1984), 134–147. MR 85f:42035
 61. Asymptotics for orthogonal polynomials associated with $\exp(-x^4)$, *SIAM J. Math. Anal.* 15 (1984), 1177–1187. MR 86i:42011
 62. A new class of orthogonal polynomials, *Proc. Amer. Math. Soc.* 91 (1984), 409–415. MR 85f:42036
 63. Two of my favorite ways of obtaining asymptotics for orthogonal polynomials, in *Functional Analysis*

- and Approximation*, P. L. Butzer, R. L. Stens and B. Sz.-Nagy, eds., ISNM 65, Birkhäuser Verlag, Basel, 1984, 417–436. MR 87g:42044
64. Mean Cesàro summability of orthogonal polynomials (with A. Máté and V. Totik), in *Constructive Theory of Functions*, B. Sendov, P. Petrushev, R. Maleev and S. Tashev, eds., Publishing House of the Bulgarian Academy of Sciences, Sofia, 1984, 588–599.
 65. Asymptotics for solutions of smooth recurrence equations (with A. Máté), Proc. Amer. Math. Soc. 93 (1985), 423–429. MR 86d:39002
 66. Asymptotic expansion of ratios of coefficients of orthogonal polynomials with exponential weights (with A. Máté and T. Zaslavsky), Trans. Amer. Math. Soc. 287 (1985), 495–505. MR 86b:42024
 67. Mean convergence of Hermite-Fejér interpolation (with P. Vértesi), J. Math. Anal. Appl. 105 (1985), 26–58. MR 86h:41004
 68. Asymptotics for the ratio of leading coefficients of orthonormal polynomials on the unit circle (with A. Máté and V. Totik), Constr. Approx. 1 (1985), 63–69. MR 85j:42045
 69. Asymptotics for orthogonal polynomials defined by a recurrence relation (with A. Máté and V. Totik), Constr. Approx. 1 (1985), 231–248. MR 89a:42035
 70. Solution of Turán’s problem on divergence of Lagrange interpolation in L^p with $p > 2$, J. Approx. Theory 43 (1985), 190–193. MR 86d:41004
 71. Exact bounds for orthogonal polynomials associated with exponential weights, J. Approx. Theory 44 (1985), 82–85. MR 86g:42042
 72. Divergence of lacunary trigonometric interpolation (with P. Vértesi), Acta Math. Acad. Sci. Hungar. 45 (1985), 381–39. MR 87a:42009
 73. Orthogonal polynomials on infinite intervals, in *Special Functions: Theory and Computation*, Rendiconti del Seminario Matematico Università e Politecnico Torino, Fascicolo Speciale, Torino, 1985, 215–236. MR 88h:42025
 74. Extensions of Szegő’s theory of orthogonal polynomials, in *Polynômes Orthogonaux et Applications*, Proceedings, Bar-le-Duc, 1984, C. Brezinski, A. Draux, A. P. Magnus and A. Ronveaux, eds., Lecture Notes in Mathematics, Vol. 1171, Springer Verlag, Berlin, 1985, 230–238. MR 87k:42024
 75. Asymptotics for the greatest zeros of orthogonal polynomials (with A. Máté and V. Totik), SIAM J. Math. Anal. 17 (1986), 745–751. MR 87h:42040
 76. Orthogonal polynomials, measures and recurrence relations (with J. Dombrowski), SIAM J. Math. Anal. 17 (1986), 752–759. MR 87g:42039
 77. Oscillatory behavior of orthogonal polynomials (with A. Máté and V. Totik), Proc. Amer. Math. Soc. 96 (1986), 261–268. MR 87m:42022
 78. Letter to a friend, J. Approx. Theory 46 (1986), 4–8. MR 87j:01062a
 79. Necessary conditions for weighted mean convergence of Fourier series in orthogonal polynomials (with A. Máté and V. Totik), J. Approx. Theory 46 (1986), 314–322. MR 87j:42074
 80. *Géza Freud, Orthogonal Polynomials and Christoffel Functions* (A Case Study), J. Approx. Theory 48 (1986), 3–167. MR 88b:42032
 81. Weighted polynomial inequalities (with V. Totik), Constr. Approx. 2 (1986), 113–127. MR 88h:41022
 82. Asymptotics for the zeros of orthogonal polynomials associated with infinite intervals (with A. Máté and V. Totik), J. London Math. Soc. (2) 33 (1986), 303–310. MR 87i:42037
 - 83a. Gábor Szegő, in Hungarian, Magyar Tudomány 8-9 (1986), 728–736.
 - 83b. Hungarian scientists, XVI: Gábor Szegő, in Hungarian, Nyelvünk és Kulturánk 65 (1986), 57–63.
 - 84a. Extensions of Szegő’s theory of orthogonal polynomials, II (with A. Máté and V. Totik), Constr. Approx. 3 (1987), 51–72. MR 88m:42044a
 - 84b. Erratum to “Extensions of Szegő’s theory of orthogonal polynomials, II” (corrected dates of receipt

- and revision are July 1, 1985, and January 28, 1986, resp.), (with A. Máté and V. Totik), *Constr. Approx.* 3 (1987), 410. MR 88m:42044b
85. Extensions of Szegő's theory of orthogonal polynomials, III (with A. Máté and V. Totik), *Constr. Approx.* 3 (1987), 73–96. MR 88m:42044a
86. Strong and weak convergence of orthogonal polynomials (with A. Máté and V. Totik), *Amer. J. Math.* 109 (1987), 239–282. MR 88d:42040
- 87a. Orthogonal polynomials, measures and recurrences on the unit circle, *Séminaire Mathématique (nouvelle série)*, Institut Mathématique Pure at Appliquée, Université Catholique de Louvain 89 (1986), XI-1 – XI-28.
- 87b. Orthogonal polynomials, measures and recurrences on the unit circle, *Trans. Amer. Math. Soc.* 300 (1987), 175–189. MR 88d:42041
- 88a. Quadrature sums involving p th powers of polynomials (with D. S. Lubinsky and A. Máté), NRIMS Technical Report TWISK 392, National Research Institute for Mathematical Sciences, CSIR, Pretoria, 1985, 1–33.
- 88b. Quadrature sums involving p th powers of polynomials (with D. S. Lubinsky and A. Máté), *SIAM J. Math. Anal.* 18 (1987), 531–544. MR 89h:41058
89. A new quadrature formula associated with the ultraspherical polynomials (with A. K. Varma), *J. Approx. Theory* 50 (1987), 133–140. MR 88j:41066
90. Asymptotic expansions of recurrence coefficients of asymmetric Freud polynomials (with W. C. Bauldry and A. Máté), in *Approximation Theory V*, C. K. Chui, L. L. Schumaker, and J. D. Ward, eds., Academic Press, New York, 1987, 251–254. MR 88e:41003
91. Derivatives of orthogonal polynomials and characterization of weights (with S. S. Bonan and D. S. Lubinsky), in *Approximation Theory V*, C. K. Chui, L. L. Schumaker, and J. D. Ward, eds., Academic Press, New York, 1987, 271–274. MR 88e:41003
- 92a. Orthogonal polynomials and their derivatives, II (with S. S. Bonan and D. S. Lubinsky), NRIMS Technical Report TWISK 410, National Research Institute for Mathematical Sciences, CSIR, Pretoria, 1985, 1–25.
- 92b. Orthogonal polynomials and their derivatives, II (with S. S. Bonan and D. S. Lubinsky), *SIAM J. Math. Anal.* 18 (1987), 1163–1176. MR 89a:42032
93. Polynomial approximation with exponential weights (with Z. Ditzian, D. S. Lubinsky and V. Totik), *Acta Math. Acad. Sci. Hungar.* 50 (1987), 165–175. MR 89b:41032
94. Markov–Bernstein inequalities revisited (with D. S. Lubinsky), *Approx. Th. Appl.*, Nanjing Univ. 3 (1987), 98–119. MR 89e:41018
95. Sharp Nikol'skiĭ inequalities with exponential weights (with V. Totik), *Analysis Math.* 13 (1987), 261–267. MR 89h:41034
- 96a. Freud's Conjecture and approximation of reciprocals of weights by polynomials (with A. Knopfmacher and D. S. Lubinsky), NRIMS Technical Report TWISK 473, National Research Institute for Mathematical Sciences, CSIR, Pretoria, 1986, 1–24.
- 96b. Freud's conjecture and approximation of reciprocals of weights by polynomials (with A. Knopfmacher and D. S. Lubinsky), *Constr. Approx.* 4 (1988), 9–20. MR 89e:42016
97. Asymptotics for the solutions of systems of smooth recurrence equations (with W. C. Bauldry and A. Máté), *Pacific J. Math.* 133 (1988), 209–227. MR 89m:39002
- 98a. Twisted difference operators and perturbed Chebyshev polynomials (with A. Máté and V. Totik), *Séminaire Mathématique (nouvelle série)*, Institut Mathématique Pure at Appliquée, Université Catholique de Louvain 94 (1986), III-1 – III-43.
- 98b. Twisted difference operators and perturbed Chebyshev polynomials (with A. Máté and V. Totik), *Duke Math. J.* 57 (1988), 301–331. MR 89f:39005

99. Factorization of second order difference equations and its application to orthogonal polynomials (with A. Máté), in *Orthogonal Polynomials and Their Applications*, M. Alfaro, J. S. Dehesa, F. J. Marcellán, J. L. Rubio de Francia, J. Vinuesa, eds., Lecture Notes in Mathematics, Vol. 1329, Springer-Verlag, New York, 1988, 158–177. MR 90d:39002
100. Eigenvalues of finite band-width Hilbert space operators and their applications to orthogonal polynomials (with A. Máté), *Can. J. Math.* 41 (1989), 106–122. MR 90k:47007
- 101a. Characterization of measures associated with orthogonal polynomials on the unit circle, *Rocky Mountain J. Math.* 19 (1989), 293–302. MR 90m:42034a
- 101b. Erratum to Characterization of measures associated with orthogonal polynomials on the unit circle (corrected date of receipt is June 3, 1986), *Rocky Mountain J. Math.* 19 (1989), 1111. MR 90m:42034b
102. Convergence of Hermite-Fejér interpolation at zeros of generalized Jacobi polynomials (with P. Vértesi), *Acta Sci. Math. Szeged* 53 (1989), 77–98. MR 90i:41009
103. Orthogonal polynomials and their zeros (with V. Totik), *Acta Sci. Math. Szeged* 53 (1989), 99–104. MR 90i:33021
104. Some convergence estimates of a linear positive operator (with G. Criscuolo and G. Mastroianni), in *Approximation Theory VI, Vol. I*, C. K. Chui, L. L. Schumaker, and J. D. Ward, eds., Academic Press, New York, 1989, 153–156. MR 91k:41044
105. Asymptotics for solutions of smooth recurrence equations and their applications to orthogonal polynomials (with S.-W. Jha and A. Máté), in *Approximation Theory VI, Vol. II*, C. K. Chui, L. L. Schumaker, and J. D. Ward, eds., Academic Press, New York, 1989, 345–348. MR 91j:41002
106. Research problems in orthogonal polynomials, in *Approximation Theory VI, Vol. II*, C. K. Chui, L. L. Schumaker, and J. D. Ward, eds., Academic Press, New York, 1989, 449–489. MR 91m:42023
107. Results on mean convergence of derivatives of Lagrange interpolation (with P. Vértesi), in *Approximation Theory VI, Vol. II*, C. K. Chui, L. L. Schumaker, and J. D. Ward, eds., Academic Press, New York, 1989, 491–494. 91j:41002
108. *Orthogonal Polynomials: Theory and Practice*, Paul Nevai, ed., NATO ASI Series C: Mathematical and Physical Sciences, Vol. 294, Kluwer Academic Publishers, Dordrecht-Boston-London, 1990. MR 91k:00039
109. Hilbert transforms and Lagrange interpolation, Letter to the Editor, *J. Approx. Theory* 60 (1990), 360–363. MR 91a:42008
110. Necessary conditions for mean convergence of Hermite-Fejér interpolation (with A. Máté), in *A tribute to Paul Erdős*, A. Baker, B. Bollobás, and A. Hajnal, eds., Cambridge University Press, Cambridge, 1990, 317–330. MR 92m:41014
111. A generalization of Poincaré’s theorem for recurrence equations (with A. Máté), *J. Approx. Theory* 63 (1990), 92–97. MR 92c:39001
112. Asymptotics expansions for solutions of smooth recurrence equations (with S.-W. Jha and A. Máté), *Proc. Amer. Math. Soc.* 110 (1990), 365–370. MR 91a:33008
113. A brief survey of generalized polynomials in *Proceedings of the Sixteenth South African Symposium on Numerical Mathematics, San Lameer, July 9–11, 1990*, S. Abelman, ed., University of Natal, Durban, 1990, 51–53.
114. The work of G. G. Lorentz: the 1975–1990 period, in *Approximation Theory and Functional Analysis*, C. K. Chui, ed., Academic Press, Boston, 1991, 15–22.
115. Associated generalized Jacobi functions and polynomials (with G. Criscuolo and G. Mastroianni), *J. Math. Anal. Appl.* 158 (1991), 15–34. MR 92h:33018
- 116a. A simple proof of “Favard’s theorem” on the unit circle (with T. Erdélyi, J. S. Geronimo and J. Zhang), in *Trends in Functional Analysis and Approximation Theory (Acquafredda di Maratea, 1989)*, Estratti Dagli Atti del Seminario Matematico e Fisico dell’Università di Modena, Italy, 1991, 41–46. MR

92m:42025

- 116b. A simple proof of “Favard’s theorem” on the unit circle (with T. Erdélyi, J. S. Geronimo and J. Zhang), *Atti del Seminario Matematico e Fisico dell’Università di Modena*, 39 (2) (1991), 551–556. MR 93a:42010
- MISC. Editorial (with Allan Pinkus), *J. Approx. Theory*, 61:1 (1990), 1.
- 117a. The supports of measures associated with orthogonal polynomials and the spectra of the real self adjoint operators (with A. Máté and W. Van Assche), *Preprint Series, Dept. Math., Katholieke Universiteit Leuven*, 2 (2) (1990), 5–32.
- 117b. The supports of measures associated with orthogonal polynomials and the spectra of the real self-adjoint operators (with A. Máté and W. Van Assche), *Rocky Mountain J. Math.* 21 (1991), 501–527. MR 92i:42015
118. Weakly convergent sequences of functions and orthogonal polynomials, *J. Approx. Theory* 65 (1991), 322–340. MR 92f:42031
119. *Progress in Approximation Theory*, Paul Nevai and Allan Pinkus, eds., Academic Press, Boston, 1991. MR 92b:41002
120. Szegő’s extremum problem on the unit circle (with A. Máté and V. Totik), *Ann. Math.* 134 (1991), 433–453. MR 92i:42014
121. Orthogonal polynomials: their growth relative to their sums (with V. Totik and J. Zhang), *J. Approx. Theory* 67 (1991), 215–234. MR 92k:42034
122. Mean convergence of derivatives of Lagrange interpolation (with G. Mastroianni), *J. Comp. Appl. Math.* 34 (1991), 385–396. MR 92b:41007
123. Inequalities for generalized non-negative polynomials (with A. Máté and T. Erdélyi), *Constr. Approx.* 8 (1992), 241–255. MR 93e:41020
124. Compact perturbations of orthogonal polynomials (with W. Van Assche), *Pacific J. Math.* 153 (1992), 163–184. MR 93c:42022
125. Generalized polynomial weights, Christoffel functions, and zeros of orthogonal polynomials (with T. Erdélyi), *J. Approx. Theory* 69 (1992), 111–132. MR 93c:33004
126. Orthogonal polynomials, recurrences, Jacobi matrices, and measures, in *Progress in Approximation Theory*, A. A. Gonchar and E. B. Saff, eds., Computational Mathematics, Vol. 17, Springer-Verlag, New York, 1992, 79–104. MR 94g:42037
127. Sub-exponential growth of solutions of difference equations (with D. S. Lubinsky), *J. London Math. Soc.* 46 (1992), 149–160. MR 94b:39005
128. Rate of relative growth of orthogonal polynomials (with J. Zhang), *J. Math. Anal. Appl.* 175 (1993), 10–24. MR 94d:42028
129. Mean convergence of derivatives of extended Lagrange interpolation with additional nodes (with G. Criscuolo and G. Mastroianni), *Math. Nachr.* 163 (1993), 73–92. MR 94g:65011
130. Remarks on the $(C, -1)$ -summability of the distribution of zeros of orthogonal polynomials (with W. Van Assche), *Proc. Amer. Math. Soc.* 122 (1994), 759–767. MR 96c:42054
131. Mean convergence of Hermite interpolation (with Y. Xu), *J. Approx. Theory*, 77 (1994), 282–304. MR 95d:41004
- MISC. Richard A. Askey and Frank W. J. Olver (with G. Andrews, G. Gasper, and M. Ismail), dedication, *SIAM J. Math. Anal.* 25 (1994), vii–ix.
