## EAST COAST OPERATOR ALGEBRA SYMPOSIUM

Oct. 12-13, 2019 • The Ohio State University, Columbus, OH

Join us for the 17th East Coast Operator Algebra Symposium (ECOAS). The ECOAS focuses on operator algebras (C\* and von Neumann algebras) and non-communative geometry, with applications to a wide array of disciplines, including ergodic theory, representation theory and mathematical physics.

## **Confirmed Speakers include:**

José Carrión, Texas Christian University
Jorge Castillejos, KU Leuven
lan Charlesworth, University of California, Berkeley
Cain Edie-Michell, Vanderbilt University
Carla Farsi, University of Colorado
Mahya Ghandehari, University of Delaware
Sherry Gong, University of California, Los Angeles
Alexander Gorokhovsky, University of Colorado
Brent Nelson, Michigan State University
Pieter Spaas, University of California, Los Angeles
Zhizhang Xie, Texas A&M University

All participants, including invited speakers, are asked to register online at **go.osu.edu/ecoas2019**. Registration will be open through September 15, 2019.

Visit **go.osu.edu/ecoas-info** for more information about this workshop.
