

Great Plains Operator Theory Symposium

May 15-19, 2023 • Columbus, OH

The 2023 Great Plains Operator Theory Symposium (GPOTS) will be held at The Ohio State University from May 15-19, 2023. GPOTS focuses on recent advances in operator algebras (C^* algebras, von Neumann algebras, and non-commutative geometry) and operator theory, with applications to a wide array of disciplines, including ergodic theory, representation theory, logic, and mathematical physics.

Confirmed speakers include:

Estelle Basor, American Institute of Mathematics
Alexandru Chirvasitu, University at Buffalo
Fritz Gesztesy, Baylor University
Isaac Goldbring, University of California, Irvine
Ben Hayes, University of Virginia
Srivatsav Kunnawalkam Elayavalli, IPAM at UCLA
Marcelo Laca, University of Victoria
Doron Lubinsky, Georgia Institute of Technology
Judith Packer, University of Colorado
Emily Peters, Loyola University Chicago
Sarah Reznikoff, Kansas State University
Camila Sehnm, University of Waterloo
Aaron Tikuisis, University of Ottawa
Brett Wick, Washington University, St. Louis
Guoliang Yu, Texas A&M University

All participants, including invited speakers, are asked to register online at go.osu.edu/gpots-reg. Registration will be open through April 1, 2023.

Visit go.osu.edu/gpots-info for more information about this workshop.
